Julian Hunt - Publications

    The resistance of a blunt body in a strong transverse magnetic field. *Magneto gidrodinamika*, **1**(34). [In Russian.]
Three-dimensional MHD duct flows with strong transverse magnetic fields. Part II.

17. Hancock, R. and Hunt, J.C.R., 1971

Three-dimensional MHD duct flows with strong transverse magnetic field. Part III.

27. Hunt, J.C.R., 1974

31. Hunt, J.C.R., 1975

34. Hunt, J.C.R., 1976

Air Pollution Dispersion. Film PT272/07 and Programme Notes made with BBC for Open University Course on Environmental Control and Public Health.

Applications of laboratory and theoretical MHD duct flow studies in fusion reactor technology. UKAEA Culham Report, CLM 169.
   Flows through groups of bluff bodies: an introductory survey. Paper presented to 52nd
   Industrial Fluid Mechanics Research Meeting, N.P.L. January (published in minutes of
   the meeting).

   Kinematical studies of the flow around free or surface-mounted obstacles: applying
   topology to flow visualisation. *J. Fluid Mech.*, 86(1), 179-200; corrigendum 95, 796.

   The uniform distortion of thermal and velocity mixing layers. *J. Fluid Mech.*, 86(3),
   465-490.

*44. Hunt, J.C.R., 1978
   A review of the theory of rapidly distorted turbulent flows and its applications.
   Proc. of XIII Biennial Fluid Dynamics Symposium, Kortowo, Poland, September.
   *Fluid Dynamics Transactions*, 9, 121-152.

   The drag coefficient of finite-aspect ratio perforated circular cylinders. *J. Wind
   Engineering & Industrial Aerodynamics*, 3(4), 251-257.

   Mixing by a turbulent wake of a uniform temperature gradient in the approach

47. Puttock, J.S. and Hunt, J.C.R., 1979
   Turbulent diffusion from sources near obstacles with separated wakes. Part I. An eddy

   MHD flows and turbulence: a report of the 2nd Batsheva Seminar. *J. Fluid Mech.*, 91,
   563-580.

   A Lagrangian statistical analysis of diffusion from a ground level source in a turbulent

51. Eskridge, R.E. and Hunt, J.C.R., 1979
   Highway modelling. Part I. Predictions of velocity and turbulence fields in the wake of

   Meteor.*, 18(4), 401.

   Velocity measurements and order-of-magnitude estimates of the flow between two

Fluctuating surface pressure on bluff structures in turbulent winds: further theory and comparison with experiment. *Proc. 5th Int. Conf. on Wind Engineering*, Ft. Collins, Colo., July; Pergamon, 319-269.

60. Holroyd, R.J. and Hunt, J.C.R., 1980

64. Hunt, J.C.R., 1980

71. Hunt, J.C.R., 1982

74. Moore, D.J. and Hunt, J.C.R., 1983

*77. Moore, D.J. and Hunt, J.C.R., 1984

80. Hunt, J.C.R., 1984

*82. Hunt, J.C.R. and Richards, K.J., 1984
Stratified airflow over one or two hills.OHOLE Conference on Boundary Layer Structure - Modelling and Application to Air Pollution and Wind Energy, Zichron-Ya'Acov, Israel. March; Boundary Layer Meteorology, 30, 223-259.

The structure of strongly stratified flow over hills; dividing streamline concepts. J. Fluid Mech., 152, 249-288.

85. Hunt, J.C.R., 1984
Flow round bluff obstacles. Lecture notes Von Karman Institute, Brussels.

86. Snyder, W.H. and Hunt, J.C.R., 1984
Turbulent diffusion from a point source in stratified and neutral flows around a three-dimensional hill. Pt. II. Laboratory measurements of surface concentrations. Atmos. Env.,18(10), 1969-2002.

*89. Hunt, J.C.R., 1985
   The initial and gravity spreading phases of heavy gas dispersion: comparison of models
   with Phase I data. Proc. Symp. on Heavy Gas Dispersion Trials at Thorney Island.

   Two-dimensional stratified flow over valleys: linear theory and a laboratory

   Unsteady gravity current flows over obstacles - some observations and analysis related
   to the Phase II trials. Proc. Symp. on Heavy Gas Dispersion Trials at Thorney Island.

   Diffusion in the stably stratified atmospheric boundary layer. *J. Climatology and

   Soc.*, **111**(469), 793-815.

95. Nalpanis, P. and Hunt, J.C.R., 1985
   Saltating and suspended particles over flat and sloping surfaces. I.Modelling

96. Hunt, J.C.R., 1985
   Turbulence and Diffusion in Stable Environments, Preface and Editor, Clarendon Press,
   Oxford.

   Study of the electromagnetic features in channel induction furnaces. *Proc. 4th Bat Sheva
   Seminar on MHD Flows and turbulence. Prog. in Astronautics and Aeronautics*, **100**,
   706-715.

   Turbulent flow near density inversion layers. *Proc. of Euromech 199 on 'Direct and
   Large Eddy Simulation of Turbulent Flows'* (Ed. U. Schumann), Vieweg.

99. Sawford, B.L. and Hunt, J.C.R., 1986
   Effects of turbulence structure, molecular diffusion and source size on fluctuations of

*10

0. Carruthers, D.J. and Hunt, J.C.R., 1986
   Velocity fluctuations near an interface between a turbulent region and a stably stratified

120. Lawson, R.E. Jr., Snyder, W.H. and Hunt, J.C.R., 1988

123. Coelho, S.L.V. and Hunt, J.C.R., 1989
   Vorticity dynamics of the near field of strong jets in cross flows. *J. Fluid Mech.*, 200, 95-120, also Proc. IMA/SMAI.

   Rapid distortion theory as a means of exploring the structure of turbulence, in 'New perspectives in Turbulence' (Ed. L. Sirovich) Springer Verlag, 55-104.

   The response of a turbulent boundary layer to arbitrarily distributed roughness change. Q. J. Roy. Met. Soc., 116(493), 611-635.

   A note on velocity, vorticity and helicity of inviscid fluid elements. J. Fluid Mech., 229,

Kinematic simulation of the space-time structure of turbulent flow. *ERCOFTAC bulletin, VI,* 4-9.

   Structure of turbulence in stably stratified atmospheric boundary layers; comparison of
event eddy simulations and theoretical models. Proc. 3rd I.M.A. Conf. on Stably

   Kolmogorov's contributions to the physical and geometrical understanding of small-
scale turbulence and recent developments. Special edition of Proc. R. Soc. A 1991, 434,
183--210, (Eds. J.C.R. Hunt, O.M. Phillips and D. Williams).

   Fractal dimensions and spectra of interfaces with application to turbulence. Proc. R. Soc.
A, 435, 505-534.

   The drag on an undulating surface induced by the flow of a turbulent boundary layer. J.
Fluid Mech., 249, 557-598.

   UK atmospheric dispersion modelling system. 'Air pollution modelling and its
application IX', Proc. 19th NATO/CCMS international technical meeting, Crete, Sept

   The modelling of perturbed turbulent boundary layers. Advances in Turbulence 3. (Eds.

Dynamics, 58, 147-171.

   Structure of turbulent boundary layers perturbed over short length scales. Eighth
Symposium on Turbulent Shear Flows, Munich, Sept. 1991. Springer-Verlag, pp 12-2-1-
12-2-5.

   Kinematic simulation of homogeneous turbulence by unsteady random Fourier modes. J.
Fluid Mech., 236, 281-318.

   Developments in computational modelling of turbulent flows. In: 'ERCOFTAC
workshop on numerical simulation of unsteady flows' (Ed. O. Pirroneau, W.Rodi, I. L.
Rhyming, A. M. Savill and T. V. Truong), Cambridge Univ. Press.1-76. (Updated and
shortened version 'Theoretical limitations of computational modelling of turbulent

Report of First European Conference on Applications of Meteorology. ERCOFTAC

Turbulence, waves and mixing at stratified density interfaces; modelling and experiments. Proc 4th IMA Conf. on 'Stratified flows dots' (Eds. N. Rockliff and I. Castro), Clarendon, 175-200.

Introductory remarks to the IUTAM conference and ERCOFTAC workshop on 'Eddy

Turbulence, wave motion and entrainment at inversion layers. Submitted to *J. Fluid Mech.,*

Atmospheric flow through groups of buildings and dispersion from localised sources. In: *Wind Climate in Cities, Proc. NATO Advanced Study Institute, Karlsruhe*. (Eds. J.E.

Urban forms, the material of the built environment, shapes and the orientation of individual buildings are important features of the urban environment that contribute to modify the surface energy balance as well as flow and dispersion characteristics (Grimmond & Oke, 1999; Millward-Hopkins, Tomlin, Ma, Ingham, & Pourkashanian, 2013; Roth, 2000).
