The Times Atlas of the World

This is the best atlas of the world. Period. It is the most accurate, clearest, most-up-to-date, and most comprehensive atlas ever published. Unlike previous atlases, it locates and names those hundreds of thousands of towns where most of the people of the world live. Take any place you want in any other atlas you want—Afghanistan, Botswana, China—and compare that spot to the stunningly crisp and full maps here. You suddenly realize the other atlas is just waving their arms vaguely. Usually places outside the US and Europe are reduced in size and left blank. Here, they prosper in splendid microscopic detail. In my travels I've found even large country-specific maps don't have the depth of reality of these pages. I now wince with pain if I have to use another atlas; browsing this one is bliss. It's got all the creeks of the Congo, all the roads of Russia, all the oases in the Gobi. And half this atlas is a divine index of 225,000 place names, with geographical coordinates in degrees and minutes. I'm in heaven! This is the fairest picture of human places on this planet yet.

Ethnologue

The Ethnologue is one of the most satisfying and evocative global snapshots I've ever come across. Compiled by the Summer Institute of Linguistics, a global Bible-translation organization, the Ethnologue is an attempt to inventory and describe all extant (and many dying) languages around the world—in two fat, complete volumes. Open up to the “Language Family Index” and you can test your knowledge of the relationships between ethnic groups in your favorite part of the world. How about the various writing systems for Batak Toba, or the total number of languages in Papua New Guinea, or the population of Swahili speakers in the United States? I often find myself roaming through it, wandering imaginatively across the tangled pathways of evolutionary, political, and economic history that these 7,000 languages represent.

The Times Atlas of the World, first published in 1895, is on its 14th edition in the current format. With 132 map plates and more than 220,000 indexed names, it is marketed as The Greatest Book on Earth. We love it because it is a benchmark of cartographic excellence, exhibiting well-crafted and refined cartography. Why it works. As you might expect, the cartography here is exquisite. There is an almost unimaginable amount of detail packed into each map, yet the positioning of every element appears to have been carefully thought through. The balance and hierarchy of detail and nuanced symbology Worldatlas on facebook. World Facts. Where Does The President Of Argentina Live? Casa Rosada is the official residence of the President Of Argentina. Aug 22, 2019. Which Countries Recognize Northern Cyprus? FYROM stands for the Former Yugoslav Republic of Macedonia. It is the former name of the country now known as North Macedonia. Aug 22, 2019. Which State is the Statue of Liberty In? The Statue of Liberty is actually located in New York, and not in New Jersey.
