- Article in edited volume:

- Edited text:

- Manuscript but should be set on separate sheets. They should be numbered consecutively in Arabic numerals with any acknowledgements should be included in the typescript or captions as appropriate.

Page proofs will be sent for correction to a first-named author unless otherwise requested. Authors should acknowledge all contributions made in the article page proofs. It is essential for authors to read the final pages carefully; any alteration to the original text is strongly discouraged.

A condition of publication that authors assign copyright or license the publication rights in their articles, including abstracts, to Taylor & Francis. This enables us to ensure full copyright protection and to disseminate the article, and of course the Journal, to the widest possible readership in print and electronic formats as appropriate. Authors retain many rights under the Taylor & Francis rights policies, which can be found at www.informaworld.com/authors/journals/copyright_positions. Authors are therefore responsible for obtaining permission to reproduce copyright material from other sources.

Corresponding authors will receive free online access to their article through our website (www.tandfonline.com). A complimentary copy of the issue containing their article will be sent to the corresponding author.
direct economical advantage of foreign trade. Therefore, international trade by enabling better and more efficient utilisation of the resources of a country increases its real national income and hence has a growth-promoting effect. Beneficial Effect #2. Widening of Market and Raising Productivity Another direct advantages of foreign trade for the economic development of underdeveloped countries is that these countries can industrialize themselves by importing necessary capital goods like machinery, semi-finished products and industrial raw materials from industrialized developed countries. In return, these countries can export primary goods and mineral resources and thus solve the problem of balance of payments. International Economics and Trade is a subject that studies the reasons of international trade, international trade policy, international trade practice, international investment and international trade and economic development. International economics and trade is one of the majors of economic and trade in economics. The international economy and trade is the exchange of goods and services between countries. International economics and Supports economic development and regional cooperation by providing trade and project financing, guarantees, and equity for development projects supporting both public and private enterprises in its member countries. Its five agencies are: International Bank for Reconstruction and Development (IBRD), International Development Association (IDA), International Finance Corporation (IFC), Multilateral Investment Guarantee Agency (MIGA), International Centre for Settlement of Investment Disputes (ICSID).
