Early research on this topic dealt with how people learn in their daily routines at their workplaces. For many people, mobile devices have been integrated into their daily lives, providing many opportunities for technology-supported incidental learning. Unlike formal education, incidental learning is not led by a teacher, nor does it follow a structured curriculum, or result in formal certification. However, it may trigger self-reflection and this could be used to encourage learners to reconceive what could otherwise be isolated learning fragments as part of more coherent and longer-term learning.

Pedagogical Content Knowledge in the Context of Foreign and Second Language Teaching: A Review of the Research Literature. M. arie. ABSTRACT: In this systematic review, 17 articles were analyzed focusing on three research questions: (1) How is pedagogical content knowledge (PCK) conceptualized in empirical research on foreign and second language (FL/L2) education? (2) How is PCK studied in empirical research on FL/L2 education? (3) What are the main conclusions of empirical research on FL/L2 education?
