UN Peacekeeping helps countries navigate the difficult path from conflict to peace. We have unique strengths, including legitimacy, burden sharing, and an ability to deploy troops and police from around the world, integrating them with civilian peacekeepers to address a range of mandates set by the UN Security Council and General Assembly. What peacekeeping does. UN Peacekeeping helps countries navigate the difficult path from conflict to peace. We have unique strengths, including legitimacy, burden sharing, and an ability to deploy troops and police from around the world, integrating them with civilian peacekeepers to address a range of mandates set by the UN Security Council and General Assembly.

Peacekeeping organizations maintain communications systems that can be deployed anywhere and are capable of voice, video and data transmission to aid in peacekeeping operations (PKOs). Technology is being used to help monitor conflicts and arms embargoes, carry out early warnings, and maintain situational awareness necessary to identify threats and support humanitarian efforts. Synthetic aperture radar and commercial satellites are used to locate and confirm large refugee movements. This is a list of UN peacekeeping missions since the United Nations was founded in 1945, organized by region, with the dates of deployment, the name of the related conflict, and the name of the UN operation. Peacekeeping, as defined by the United Nations, is a way to help countries torn by conflict create conditions for sustainable peace. UN peacekeepers’ soldiers and military officers, police officers and civilian personnel from many countries’ monitor and observe peace processes that emerge in post
